Teleconference Line: +1 (202) 991-0477 Conference

Code: 221 218 467#

Key Resources: [Revised CSAPR Update webpage](#), [Revised CSAPR Update preamble and regulatory text \(prepublication version\)](#), [Clean Air Markets Homepage](#).

You can find all Ask CAMD notes from this and previous sessions by visiting the [ECMPS Support Site](#)

[\*\*View the Presentation\*\*](#)

[\*\*View the Q and A's\*\*](#)

- I. Welcome – Ming Chang, Chief of the Market Operations Branch
- II. Introduction and Rulemaking background (for more information see the [Overview Fact Sheet](#))

Today's webinar will focus on explaining the provisions related to the implementation of the final rule. To ensure all the material is covered and to allow time for questions, we do not plan to discuss the rationale behind these or any other provisions in the final rule, nor do we plan to discuss the differences between the provisions in the proposed rule and those in the final rule. After each topic, there will be an opportunity to ask questions in addition to those submitted on the RSVP form.

- III. Key changes to allowance transfer deadlines and allowance allocations
  - a. Allowance transfer deadline of June 1 the year following a given control period for all CSAPR trading programs
  - b. One-round new unit set-aside (NUSA) process for all CSAPR trading programs
  - c. 3-year advance allowance allocation schedule for units in the Group 3 trading program
  - d. Treatment of allowances for units with scheduled and unscheduled retirement dates in the Group 3 trading program
- IV. Transitioning from the existing CSAPR NOx Ozone Season Group 2 Trading program

EPA will implement several provisions to address the transition of sources from the Group 2 trading program to the Group 3 trading program.

- a. Supplemental allowance allocations to sources in the Group 3 trading program to avoid retroactive emission reduction requirements
- b. Creation of an initial Group 3 allowance bank (see [Detailed Factsheet: Allowance Bank Conversion](#))
- c. Opportunity to obtain additional Group 3 allowances through a "safety valve" mechanism (see [Detailed Factsheet: The Safety Valve](#))

d. Recall of Group 2 allowances allocated for control periods after 2020 (see [Detailed Factsheet: Recall of 2021-2024 Group 2 Allowances for Group 3 Sources](#))

V. Wrap-up and contact information for further questions
