Changes to Quality Assurance and Certification Test XML Schema
Version 1.0

The purpose of this document is to list the changes that were made to the Quality Assurance and Certification Test XML Schema for Version 1.0.

- For the following elements in OnlineOfflineCalibrationData, the validation type was changed from "ReferenceValueType" to "CalibrationValueType":
  
  -- OnlineZeroReferenceValue
  -- OnlineUpscaleReferenceValue
  -- OfflineZeroReferenceValue
  -- OfflineUpscaleReferenceValue

This was done to support reported numbers that had up to three decimals places and 13 total digits.
